

Commissioners:

Sinclair Broadcasting needs to be taken to task for the deliberate and despicable misuse of the public's airwaves and a clear indication of the damage done to the free flow of information through media consolidation.

Sinclair enjoys the use of these airwaves by agreeing to act in the public interest, but their actions show only an interest in their own political agenda and their own bottom line.

Their decision to air an anti-John Kerry hit piece must be investigated and stopped, or they should be required to air a program of equal length representing the opposite point of view, such as "Going up river".

Thank you for your time and attention to this VERY important matter.
